

CAUTIONARY STATEMENT

Forward Looking Information This presentation contains projections and forward looking information that involve various risks and uncertainties, including, without limitation, statements regarding the potential extent of mineralization, resources, reserves, exploration results and plans and objectives of North Arrow Minerals Inc. These risks and uncertainties include, but are not restricted to, the amount of geological data available, the uncertain reliability of drilling results and geophysical and geological data and the interpretation thereof and the need for adequate financing for future exploration and development efforts. There can be no assurance that such statements will prove to be accurate. Actual results and future events could differ materially from those anticipated in such statements. These and all subsequent written and oral forward-looking statements are based on the estimates and opinions of management on the dates they are made and are expressly qualified in their entirety by this notice. The Company assumes no obligation to update forward looking statements should circumstances or management's estimates or opinions change.

Qualified Person under NI 43-101 Disclosure of a scientific or technical nature related to North Arrow's projects in this presentation has been reviewed and approved by Ken Armstrong, P.Geo. President and CEO of North Arrow and a Qualified Person under NI 43-101.

North Arrow MINERALS INC.

THE OPPORTUNITY

- EXPERIENCED TEAM Successful exploration and development (Aber; Diavik; Lucara; Stornoway; SouthernEra)
- **LEVERAGED EVALUATION** Canadian diamond projects developed over years of exploration by past companies at costs in excess of \$40 million dollars
- **SOLID FINANCIAL BACKING** >\$18M raised over last two and a half years while maintaining an attractive share structure ~54.2M shares o/s; ~59.5M shares f/d
- NEW DISCOVERIES Discovered Canada's newest diamond district at Pikoo Project, SK; more kimberlites to be discovered here and other NAR properties
- PROJECT PORTFOLIO Seven core project areas
- PURE DIAMOND PLAY Solely focused on diamond projects located in Canada at a time where diamond fundamentals are robust and predicted to remain so for the foreseeable future

CORPORATE OVERVIEW— as of January 31, 2016

MINERALS INC.

Corporate Highlights

Capitalization

Listing: TSX Venture - NAR

Issued: 54.2 M

Options: 4.3 M

Warrants: 1.0 M \$0.25 & \$0.65

Fully diluted: 59.5 M

Estimated Working Capital: \$4.5 M

Main Shareholders

Management/Directors ~16.5 %

Zebra Holdings & Investments ~18.3%

controlled by a trust settled by the late Adolf H. Lundin

CORPORATE OVERVIEW - PEOPLE

D. Grenville Thomas (Chairman) Founder of Aber Resources (now Dominion Diamond Corporation), discoverer of the Diavik Diamond Mine and 2009 Canadian Mining Hall of Fame inductee.

Ken Armstrong P.Geo.(ON) (President, CEO, Director and Qualified Person under NI 43-101) Diamond exploration and evaluation experience with Diavik Diamond Mines Inc., Aber Resources, De Beers, Navigator Exploration, and Stornoway Diamond Corporation.

Management Highlights

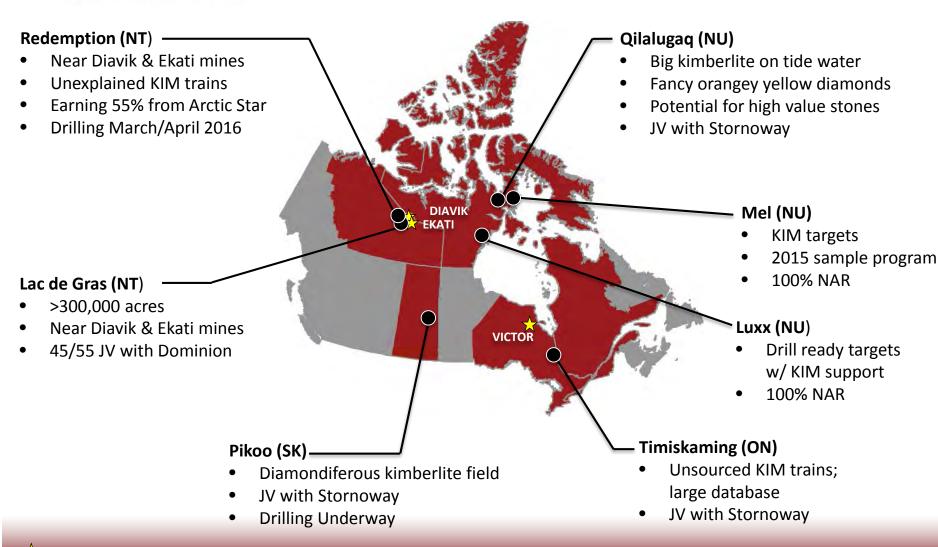

Christopher Jennings (Director) Founder of SouthernEra Diamonds Inc., consultant to Aber Resources and has held positions with numerous companies including International Corona Corp., BP Minerals (Canada) and Falconbridge Ltd.

William Lamb (Director) President and CEO of Lucara Diamond Corp., 20 years project development experience with Lucara, De Beers, Kvaerner and Rand Mines.

Blair Murdoch (Director) More than thirty years experience in senior management of private and public companies.

Eira M. Thomas (Advisor) Extensive diamond exploration and development experience in Canada and Africa. Has served as an officer and director of Aber Resources and Stornoway Diamond Corporation. Currently CEO of Kaminak Gold Corporation and a director of Suncor and Lucara Diamond Corp.

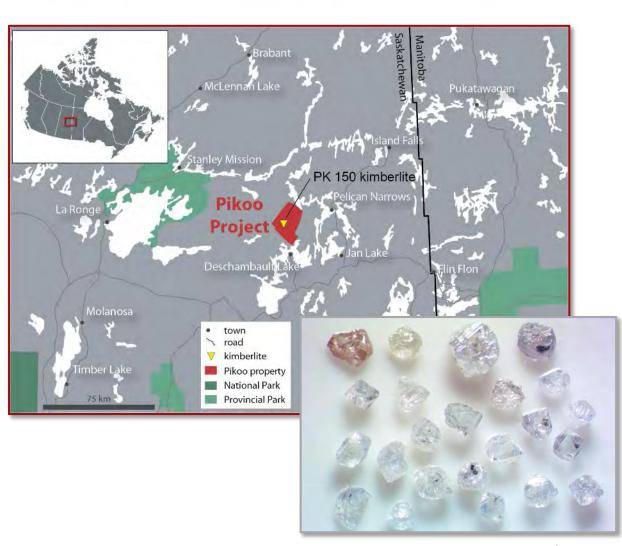

CORPORATE OVERVIEW - PROJECTS

PIKOO PROJECT, SK

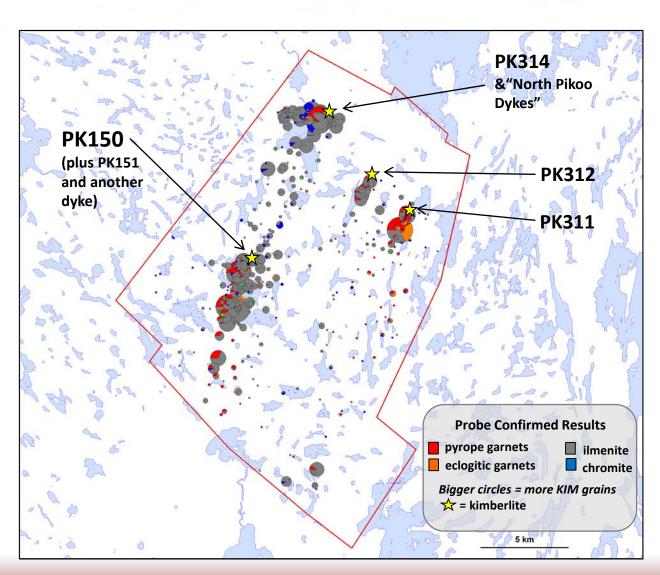

North Arrow (80%)/Stornoway
 (20%) Joint Venture.

- Good local infrastructure; within 10 km of SK Hwy 911– more than 200 km from nearest kimberlite field (FALC).
- 7 discrete kimberlites discovered to date. 4 tested and proven diamondiferous.
- PK150 most significant diamond discovery; 1232 diamonds > 0.106 mm from 531 kg.
- Spring 2016 drill program underway to fully defined known kimberlites and test new targets that came out of 2015 detailed mag survey.

PIKOO PROJECT – KIMBERLITE INDICATOR TRAINS

- 977 till samples have been collected from the property; including 550 in 2014.
- Positive samples range from 1 to 100's of KIM grains.
- Five KIM trains or anomalous areas have been identified.
- All indicator trains are probe-confirmed to be mantle derived and indicative of a kimberlitic source.

PK311

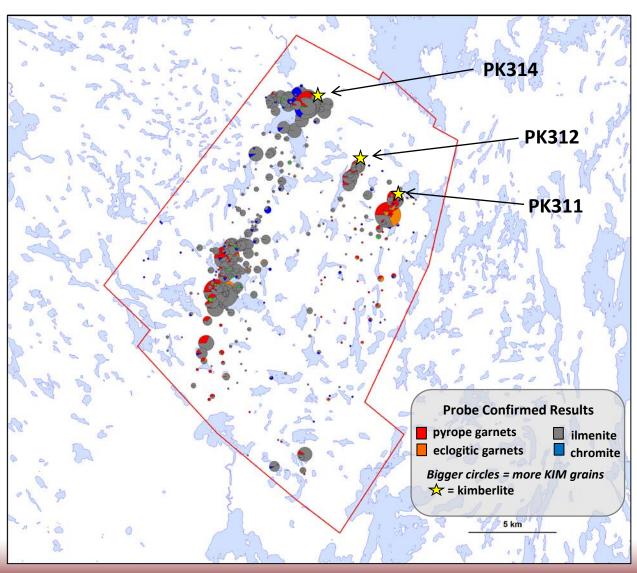

drilling collared into a weathered micaceous unit confirmed by KIM analysis as kimberlite; more drilling required to define orientation/extent of body.

PK312

1.5 m near vertical dyke; 14.5 kg sample returned five diamonds; abundant olivine, garnet, ilmenite & chrome diopside macrocrysts; further delineation required.

PK314

 25 m wide; >40 m strike length; drilled to 213m; high chrome pyrope down ice; 23 microdiamonds from 476 kg

SPRING 2015 KIMBERLITE DISCOVERIES

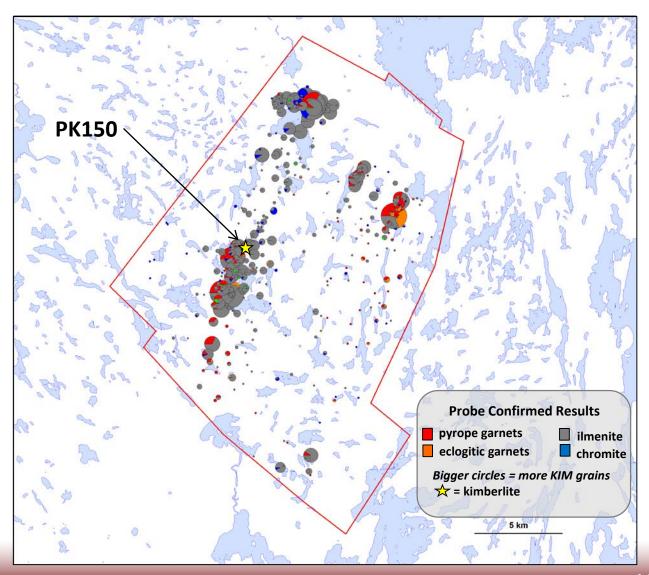

North Arrow MINERALS INC.

SPRING 2015 DRILLING - PK150

24 drill holes (3,243 m) tested kimberlite discoveries from 2013 & new targets defined by till sampling programs in 2014.

PK150 delineation drilling

- Was drilled by 6 holes (bringing total number of holes to 9)
- Strike extended to 150 m; depth to 199 m.
- Cut off to the west but remains open to east
- Eastern extension not constrained by high intensity magnetics;
- Transitional to diatreme-type textures encountered in eastern-most hole (PK-34)

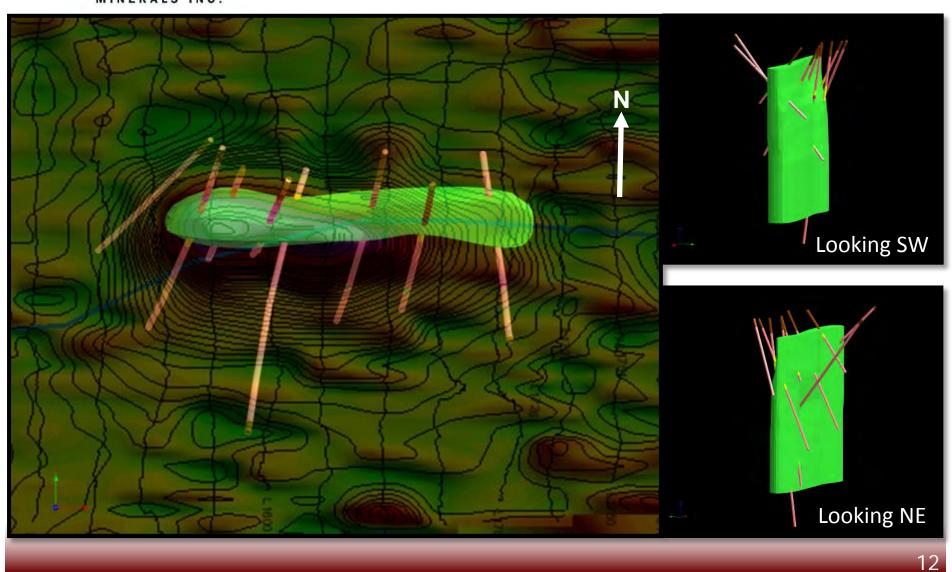

SPRING 2015 DRILLING - PK150

PK150 MODEL

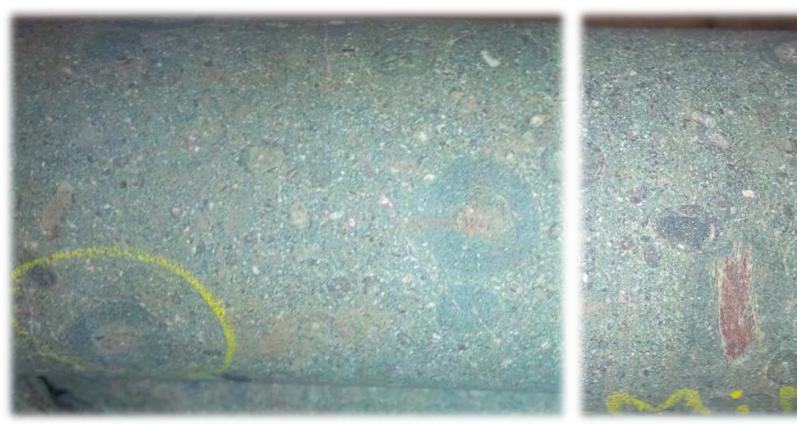

North Arrow

PK150 – Coherent Kimberlite (HK)

Transitional to KPK (Diatreme)?

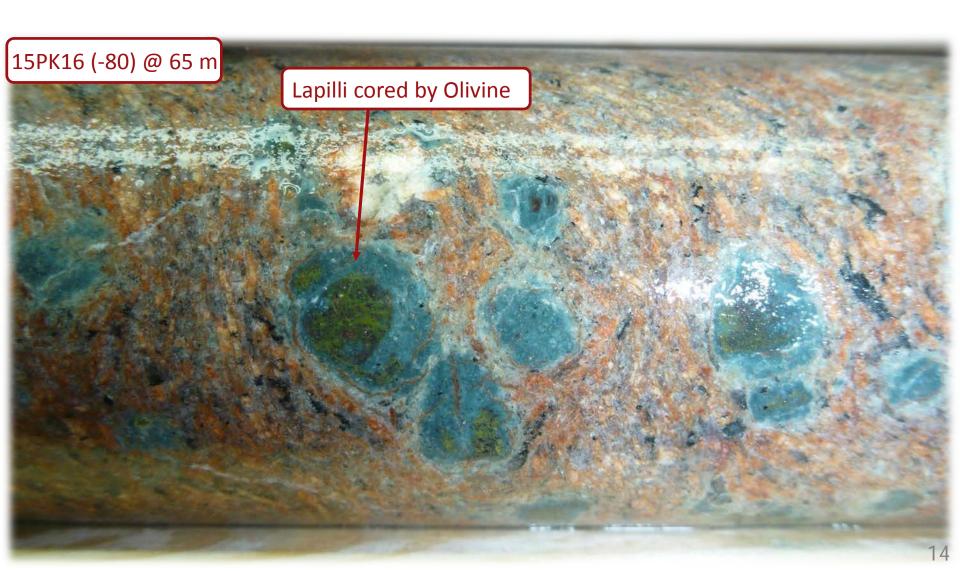

Concentric magmatic lapilli, cored by lithic fragments (CR xenoliths; autoliths) and macrocrysts (Olivine >> Ilmenite, garnet)

PK150 – Cracked Country Rock

PIKOO KIMBERLITES – MANTLE SAMPLE

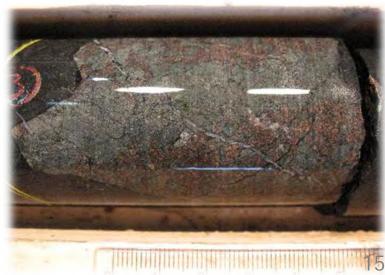

North Arrow

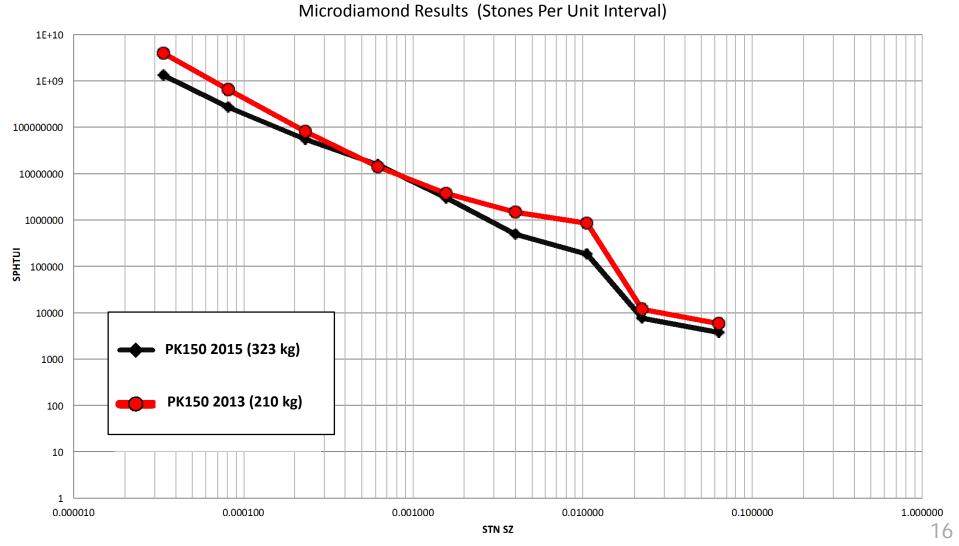

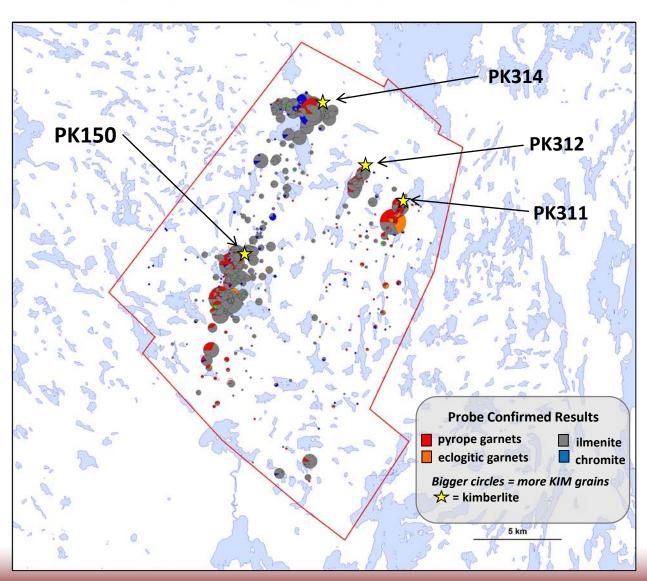

PIKOO PROJECT – THE WAY FORWARD

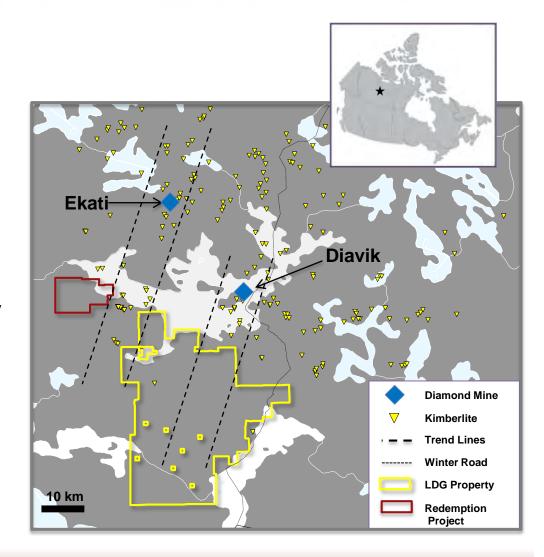

- 2016 spring drilling campaign underway; commenced 2nd week of February; until ~end of March
- To fully define the PK150, PK312 and PK311 kimberlites.
- Test additional new targets from 2015 airborne magnetic survey.
- New diamond results late spring 2016.

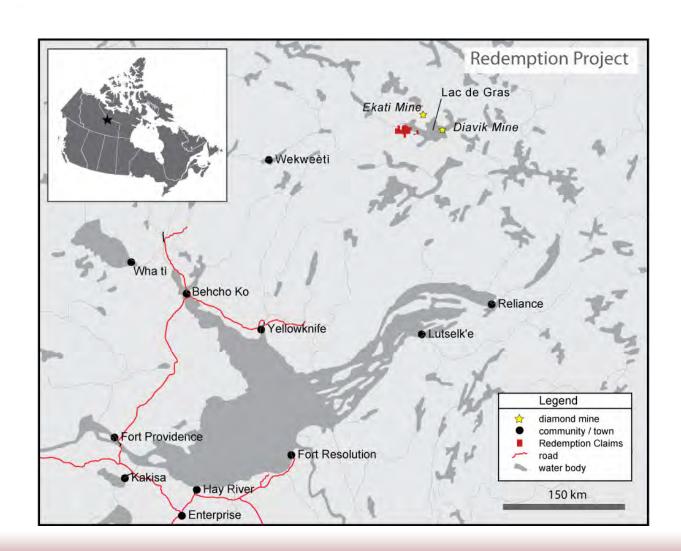

REDEMPTION & LDG PROJECTS, NT

- At the southwestern end of the Lac de Gras kimberlite field.
- LDG is a 45/55 JV with Dominion Diamond Corporation – part owner of the Ekati and Diavik diamond mines; JV approved \$1.2 million 2016 budget.
- Redemption under Option from Arctic Star Exploration; NAR can earn 55% by spending \$5 million; drill program commencing mid-March.
- Both projects host unsourced kimberlite indictor mineral trains and will benefit from ongoing comprehensive surficial geology study funded by Government. Preliminary results expected November 2015.

REDEMPTION PROJECT, NT

- 34,300 acres located within the Lac de Gras diamond district.
- 32 km southwest of Ekati diamond mine.
- 47 km west of Diavik diamond mine.
- Under Option from Arctic Star Exploration.
- NAR to spend \$5 million by 2017 to earn a 55% interest.
- Drilling to commence mid-March 2016

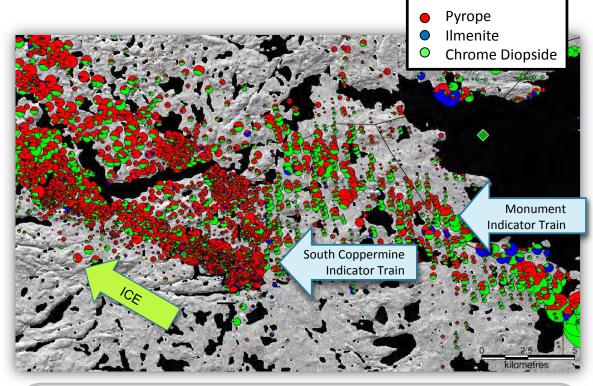

eth Arrow

REDEMPTION PROJECT HISTORY PRE-NAR

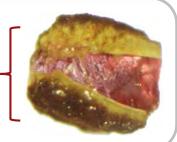

North Arrow

- Significant past exploration starting during the early 1990's diamond exploration boom of Lac de Gras.
- Over \$12 million spent by multiple companies in an effort to source the South Coppermine indicator train including:
 - ~3,100 till samples,
 - <30,000 KIM analyses,</p>
 - 10 airborne geophysical surveys but very limited drilling!
- South Coppermine train presents many low calcium, high chrome, "G10" garnets very reminiscent of the chemistry published for some of the higher grade pipes of Diavik and Ekati.

G10 Garnet from South Coppermine KIM trainKeliphytic rims suggest very little erosion of grains through transport; likely proximal to source

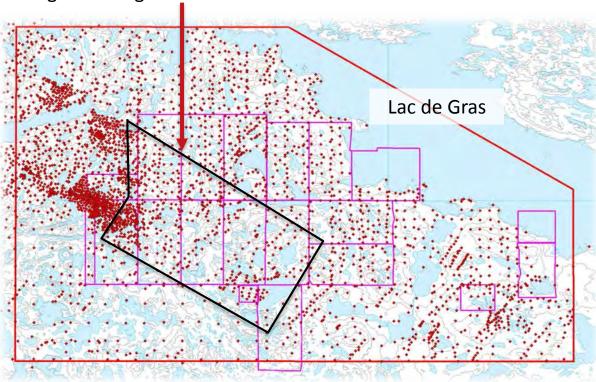

Indicator Minerals

North Arrow MINERALS INC.

WORK COMPLETED 2013 & 2014

- Arctic Star and North Arrow signed option agreement, July 2013.
- Flew Airborne Gravity Survey covering main target area in 2013.
- Detailed modelling of gravity targets and related water depth surveys of 13 lakes.
- Over 350 additional till samples collected.
- Ground geophysical surveys of 23 grids.
- August 2014 completed 7 drill holes on 6 targets but did not intersect any kimberlite.

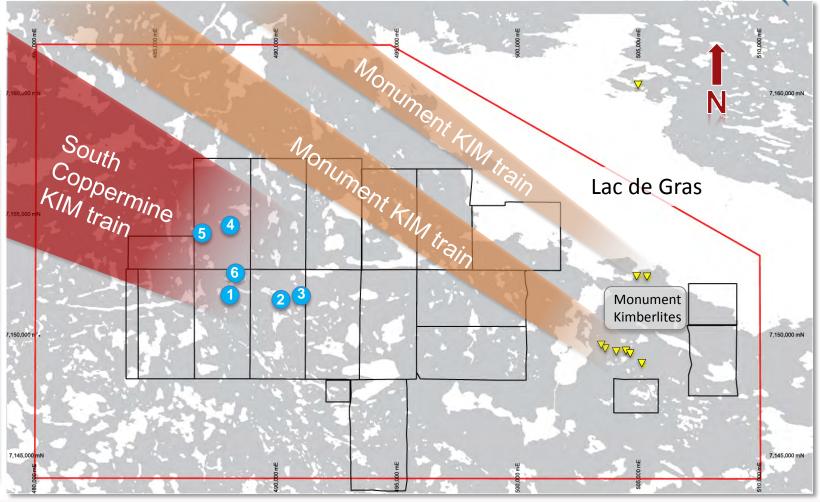

2014 DRILLING PROGRAM

North Arrow

MINERALS INC.

ST R

7 drill holes (800m) tested our 6 best targets. Kimberlite was not intersected. WHY? Decided to go back and reassess our data before drilling again. Do we really understand the glacial history?

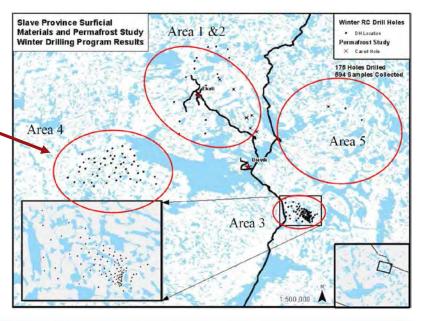

MINERALS INC.

2015 RE-ASSESSMENT WORK – NT GOV WORK

- Northwest Territories Geological Survey commenced the Slave Province Surficial Materials and Permafrost Study on five areas around Lac de Gras in March 2015; Area 4 is the South Coppermine.
- Comparative study of Monument indicator train to Coppermine indicator mineral train; one is well defined, one is enigmatic. They are proximal.
- 52 overburden reverse circulation drill holes completed within and around Redemption in March to May 2015 as part of study; more work funding dependent, but expected.

2015 RE-ASSESSMENT WORK

- NAR initiated a separate, more detailed evaluation of the surficial geology of the Redemption property in an effort to better define and interpret the South Coppermine KIM Train.
- NAR conducted ground mag surveys on 14 separate grids testing 25 targets in May 2015. All targets located up ice of the termination of the South Coppermine (KIM) train.

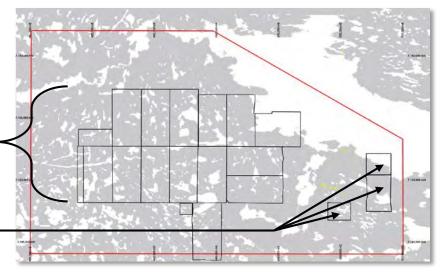

North Arrow MINERALS INC.

2016 PROGRAM FUNDING

- Jan 2016, NAR raised \$800,000 from the sale of two royalties in Redemption properties to Director, Chris Jennings to be spent drilling targets before Aug. 2016.
 - 1.25% GOR and NSR on North Arrow's possible 55% of mineral claims and leases under option from Arctic Star Exploration.
 - 1.5 % GOR and NSR on North Arrow's three
 100% owned mineral claims.

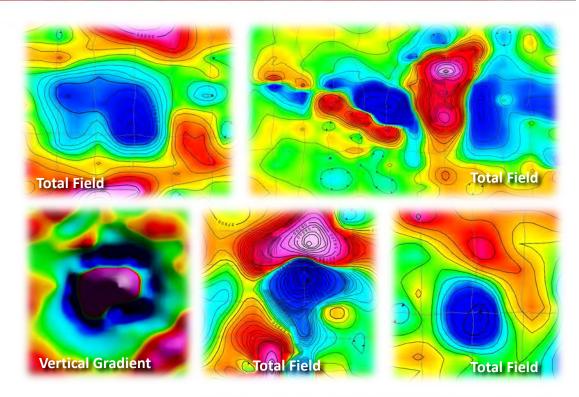

2016 DRILL PROGRAM - TARGETS

North Arrow

- Core drilling initially, focused on geophysical targets at or around the South Coppermine indicator cut-off.
- RC drill may be brought in during core drilling or for the latter half of the program to more quickly test priority remaining targets.
 - Are they, or are they not, kimberlite? Find out, move forward.

2016 DRILLING PROGRAM

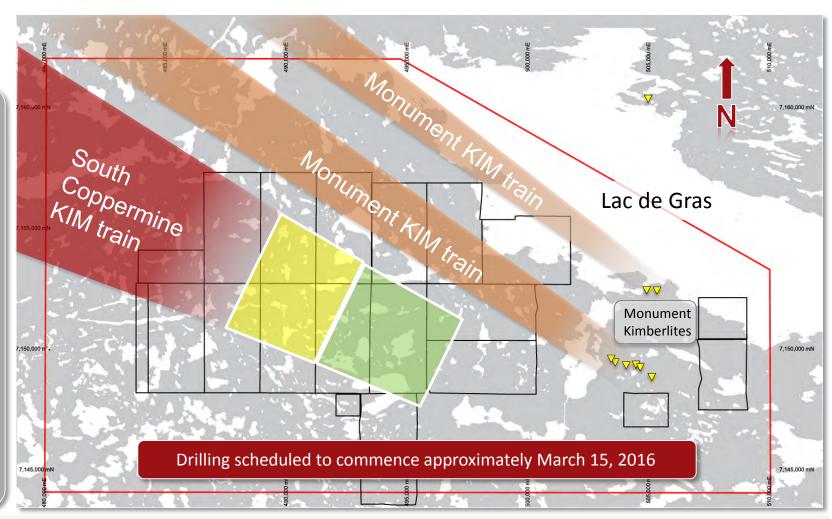

MINERALS INC.

Approximately
10 core holes
will be drilled in
the termination
area of the
South
Coppermine
Train.

RC drill rig may be brought in to more rapidly test targets east of the KIM train termination area.

Target selection still underway.

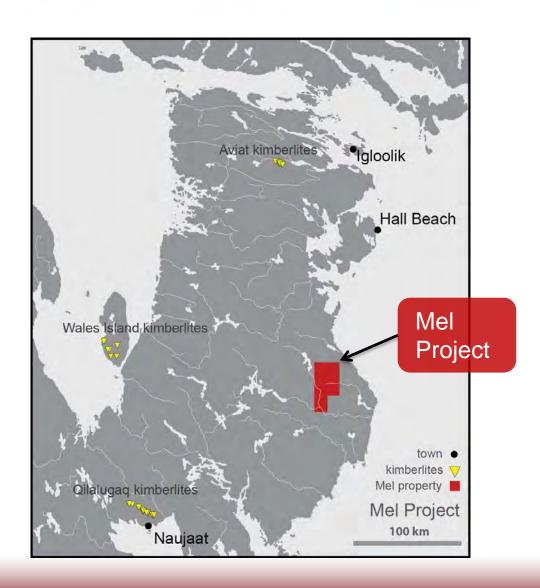

MINERALS INC.

MEL PROJECT - NU

100% owned.

- Unsourced KIM trains.
- Target area 1 is a 15km long multi-sample ribbon like mineral train up to 2.5km wide.
- May diverge into multiple narrower trains suggestive of multiple sources.
- Up-ice till sample line4km away is barren
- Excellent mineral chemistry.
- 227 till samples collected in 2015 – results will double project database.

QILALUGAQ PROJECT, NU

- Jurisdiction- Settled land claim
- Near tide water improved logistics; sealift available; proximity to workforce
- Large tonnage 48.8 million tonnes inferred resource. (May 13, 2013)*
- Good inferred resource grade 53 cpht**.

 **Total recovery +1DTC grade
- Blue sky Inferred resource only to 205m open to depth; 15 additional kimberlite bodies.
- Piamond valuation June 2015 valuation was low; challenged by: i) small parcel size, ii) lack of high value stones, and iii) lower yielding cuboid shapes.
- Possible Upside very rare Type 1b fancy coloured diamonds.

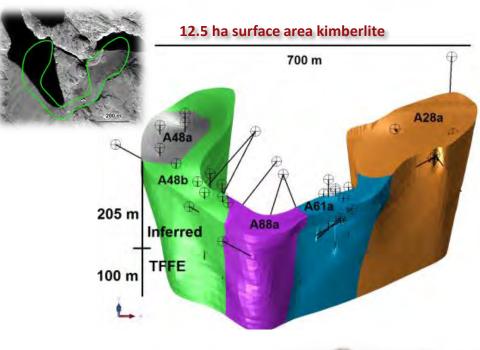

QILALUGAQ PROJECT, NU

North Arrow

- ✓ Jurisdiction- Settled land claim
- Near tide water improved logistics; sealift available; proximity to workforce

- **Possible Upside** very rare Type 1b fancy coloured diamonds.

Q1-4 DIAMONDS - TESTING POSSIBLE UPSIDE

North Arrow

MINERALS INC.

Q1-4's Yellow Diamonds:

Questions answered, questions that remain...

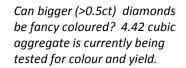

- Can they be polished?
- Are they truly fancy coloured diamonds?
- Do they deserve a premium price?
- Can bigger (>0.5ct) diamonds be fancy coloured?
- ? What is the yield?
- ? Can Q1-4 host rough diamonds that could yield +1 ct fancy orangey yellow polished? +2 ct? +3 ct?
- ? With what frequency?
- ? Can a larger, ~15,000t (~3,000 ct) sample be justified?

0.14 carat round brilliant SI1 fancy deep orangey yellow (CGL Certified); Estimated wholesale value ~US\$2,750 /ct.

THE WAY FORWARD

Project	Location	Commodity	Interest	Comment
Pikoo	Saskatchewan	Diamonds	80%	Winter drilling underway: delineation &
				discovery
Redemption	NWT	Diamonds	55%	Drill program March/April 2016
Lac de Gras	NWT	Diamonds	45%	JV approved ~\$1.2M budget for 2016;
				Gov't study prelim results pending;
Mel	Nunavut	Diamonds	100%	2015 till results pending
Luxx	Nunavut	Diamonds	100%	Permitting for drill program underway
Qilalugaq	Nunavut	Diamonds	80%	Diamond polishing exercise to assess
				path forward
Timiskaming	Ontario	Diamonds	80%	Database evaluation

- Pikoo Winter 2016 delineation drilling of PK150, PK311, and PK312 as well as new targets from heliborne mag located at heads of indicator trains; permitting; community and leadership meetings.
- Redemption 2016 drilling to commence mid March.
- Mel 2015 Till sample results; final sorting expected by end of March.
- Qilalugaq polishing exercise and colour evaluation of Q1-4 diamonds.
- North Arrow is fully funded to complete this work.
